	<i>University of Alaska - Fairbanks</i>	StrongWomen The StrongWomen Program is a progressive strength-training program designed for midlife to older women. Through scientific research Dr. Miriam Nelson demonstrated that strength training would increase strength and muscle mass and improve balance. Strength training can reduce the risk for chronic diseases such as diabetes, heart disease, arthritis and osteoporosis. Strength training has also been shown to reduce depression and contribute to a sense of well-being. The Cooperative Extension Service introduced the exercise program in February 2004. http://www.alaska.edu/uaf/ces/hhfd/	Linda Tannehill Home Economist StrongWomen Program Phone: 907-262-5824 l.tannehill@uaf.edu
		The Alaska Cooperative Extension Service The Alaska Cooperative Extension Service provides programs in support of a healthy lifestyle. Services provided include the Expanded Food and Nutrition Education Program (EFNEP), StrongWomen, the Food Stamp Nutrition Education Program (FSNE) and basic health research related to diet and physical activity in conjunction with the Center for Alaska Native Health Research. http://www.alaska.edu/canhr/research-diet.htm	Bret Luick Foods and Nutrition Specialist Cooperative Extension Service University of Alaska, Fairbanks PO Box 756180 Fairbanks, Alaska 99775 Phone: 907-474-6338 Fax: 907-474-5139 ffbrl@uaf.edu

		<p>Food Stamp Nutrition Education Program (FSNEP)</p> <p>Also known by its acronym (FSNEP), the mission of the Food Stamp Nutrition Education Program is to shape food consumption in a positive way to promote health and prevent disease among people living in Arizona.</p> <p>Since 2002, the University of Arizona Cooperative Extension has partnered with the Arizona Nutrition Network to provide nutrition education to low resource audiences in 9 counties without duplicating EFNEP's efforts. In its first year, the Arizona Nutrition Network targeted low-income Hispanic women and their children. Today, food stamp-eligible persons are targeted to receive free nutrition information and educational opportunities.</p> <p>The program was implemented using matching funds from county faculty. The Arizona Nutrition Network and DES provide reimbursement for program delivery costs which included hired staff, travel, educational and food demonstration costs. Nutrition education materials are provided to participants free of charge.</p> <p>FSNEP staff integrate 3 key nutrition and health themes into the educational materials provided to participants: Balance calorie intake from foods and beverages with calories expended; Eat 5 fruits and vegetables, plus whole grains and low fat milk or milk products every day; Add family physical activity to your day; Education materials include topics such as maintaining a healthy lifestyle, physical activity, and gardening.</p> <p>FSNEP staff also provide referrals to DES offices for food stamp benefits. http://nutrition.arizona.edu/new/fsnep.phtml</p>	<p>Dr. Scottie Misner EFNEP/FSNEP Coordinator College of Agriculture and Life Sciences University of Arizona 309 Shantz PO Box 210038 Tuscan, AZ 85721 Phone: 520-621-7123 Fax: 520-621-9446 misner@cals.arizona.edu</p>

		<p>Expanded Food and Nutrition Education Program (EFNEP)</p> <p>EFNEP utilizes trained paraprofessionals (known as Nutrition Advisors or NAs) to teach practical nutrition education to limited resource families with children. The NA's teach, in English or Spanish, a series of culturally appropriate food and nutrition lessons that lead to behavior change. EFNEP operates in four Idaho counties and one Indian reservation with lessons taught at community sites or in client homes. Topics include practical nutrition, meal planning, saving money on food, basic food preparation, infant and child nutrition, healthy snacks, breakfast, food safety, and the importance of physical activity. EFNEP partners with agencies that serve incarcerated women ready for parole, chemical dependency programs, teen and young adult parenting programs, transitional housing groups, family justice centers, welfare to work clients, parenting classes at a local Air Force Base, and USDA's summer lunch program. In all four counties, Head Start parents, WIC moms, and Food Stamp clients attend EFNEP classes.</p> <p>http://extension.ag.uidaho.edu/ada/efnep.htm</p>	<p>Linda Gossett, MPA State EFNEP Coordinator University of Idaho Extension 5880 Glenwood Boise, ID 83714 Phone: (208)376-1036 Fax: (208)375-8715 Email: lgossett@uidaho.edu</p>
		<p>MEAL TIME IN LESS TIME</p> <p>Meal Time in Less Time teaches individuals how to plan meals, shop to save time and money, and prepare healthy meals in less time. It is designed to be taught in three 1-hour sessions.</p>	<p>Marnie Spencer Bingham County 208-785-8060, marniers@uidaho.edu</p>

		<p>Indiana on the Move - America On the Move In Indiana is Improving Community Environments</p> <p>What impact does your community environment have on influencing one's behavior related to being physically active? Lots. Traditionally, those of us interested in health have tried to influence individual behavior by promoting physical activity and teaching people about proper nutrition -- in essence, working to change an individual's behavior. But that is not enough. There is plenty of research to support the need for a built environment (how are communities are developed) that supports healthy behavior.</p> <p>** this program is affiliated with Purdue University http://aom.americaonthemove.org/site/c.krLXJ3PKuG/b.1837181/k.C82F/Indiana.htm</p>	<p>Marsha Worthington, BSN, CHES</p> <p>Director 1819 Carew Street Fort Wayne, IN 46805 Phone: 260-481-4868 marsha@fwcardio.com</p>
		<p>MyPyramid: Eating Better Makes Sense</p> <p>MyPyramid: Eating Better Makes Sense is a day-in-the-life approach to understanding the USDA's new MyPyramid. The educational video features Maria, a working mom on a tight budget. Maria shows you how she and her family follow the MyPyramid plan as part of a healthy lifestyle. She demonstrates healthy food choices she makes at the grocery store and gives meal examples from her kitchen. Maria also highlights food safety tips in the store and at home. A new emphasis of MyPyramid is physical activity, and Maria shows you how you can work physical activity into the family's busy schedule.</p> <p>http://www.ces.purdue.edu/cfs/topics/FNP/mypyramidvideo-article.htm</p>	<p>Dr. William Evers</p> <p>Extension Specialist, Food and Nutrition Purdue University Cooperative Extension Service 1264 Stone Hall West Lafayette, IN 49707-1267 Phone: 765-494-8546 Fax: 765-496-2532 eversb@cfs.purdue.edu</p>

IOWA		Youth Expanded Food and Nutrition Education Program (EFNEP)/Professor Popcorn Exploring the Food Pyramid with Professor Popcorn (Professor Popcorn) is a curriculum for youth in grades 1-6. Originally written in 1993, it was extensively rewritten in 2002. Major concepts included in the curriculum have been linked to Indiana's health and science education standards. http://www.ces.purdue.edu/cfs/topics/EFNEP/professorpopcorn.htm	Angela Abbott Director, Indiana Family Nutrition Program Matthews Hall, Rm. 108 Purdue University West Lafayette IN 47907 Phone: 765-496-2488 or 765-496-2487 Fax: 496-2532 abbottar@purdue.edu
	<i>Iowa State University</i>	Expanded Food and Nutrition Education Program (EFNEP) and Family Nutrition Program (FNP) - part of Supplemental Nutrition and Assistance Program Education (SNAP-Ed) EFNEP and FNP help youth and young, low-resource families develop the knowledge, skills, attitudes, and behavior needed to improve their diet. Families learn to make informed choices about low-cost, nutritious foods; to better manage family finances; and to become more self-sufficient. The youth EFNEP/FNP programs provides six hours of nutrition education to help children develop healthy eating and exercise patterns and skills in preparing nutritious meals and snacks. The youth EFNEP program emphasizes a variety of delivery modes for reaching low-income youth, from traditional classroom settings and after-school programs during the school year to day camps and youth group activities during the summer. EFNEP/FNP is located currently in the 23 counties in Iowa. http://www.extension.iastate.edu/efnep/	Peggy A. Martin, MS, RD, SPHR State Coordinator EFNEP.SNAP-Ed Iowa State University 515-294-1511 peggyym@iastate.edu

		<p>Second Sunday KY</p> <p>Beginning in 2008, on the Second Sunday of October, counties throughout Kentucky closed a stretch of roadway (preferably at least 1 mile) or otherwise provided a group opportunity for four hours (2- 6 p.m.) allowing local residents to get out and walk, bike, run... a path that would not normally be available to them. Closing a road during this time is particularly important to rural Kentucky counties where sidewalks often do not exist for day-to-day physical activity. Second Sunday presents a compelling message of change – from being a state of spectators to one of participants and serves as a catalyst to improving physical, environmental and economic health statewide.</p> <p>http://www.ca.uky.edu/HES/secondsunday/videos/flash.html</p>	<p>Diana Doggett</p> <p>Erikson Hall Lexington, KY 40506-0050 Phone: (859) 257-3888 Fax: (859)257-7565 Email: ddoggett@uky.edu</p>
		<p>Weight the Reality Series</p> <p>Weight: The Reality Series” is an adult weight management journey of self-discovery, education, skill-building and support. The series is designed to help individuals achieve a healthy weight. Individual weight loss and 25 lifestyle behavior changes are self-monitored for progress toward goals. One-third of the 2,000 participants lost 5% or more during the 10-week program.</p>	<p>Janet Tietyen</p> <p>241 Scovell Hall Lexington, KY 40546-0064 Phone: (859) 257-1812 Fax: (859) 257-7792 Email: jtietyen@uky.edu</p>
		<p>Wellness in Kentucky</p> <p>Wellness in Kentucky targets youth ages 8 to 11 years old and their parents. Ten lessons encourage participants to eat a variety of food, balance intake and output, practice eating slowly in moderation, and be physically active each day. Two of the 10 lessons are focused on physical activity and one lesson is Variety, Balance and Moderation pointing out that a variety of foods, balanced with activity promotes healthy bodies.</p>	<p>Pam Sigler</p> <p>305A Erikson Hall Lexington, KY 40506-0050 Phone: (859) 257-4702 Fax: (859) 257-3212 Email: psigler@uky.edu</p>

		<p>Nutrition Extension Programs</p> <p>Extension nutrition education programs encourage eating and exercise habits that are consistent with national nutrition policy recommendations designed to promote health and lower chronic disease risks. Many of the major chronic and degenerative diseases - including coronary heart disease, some cancers, diabetes, high blood pressure, and osteoporosis - all have a nutrition component. It is therefore important that consumers gain awareness about how diet is related to health and learn how to change behavior to lower their risk for these diseases. Based on current research findings consistent with mainstream scientific thinking, Extension programs focus on helping individuals become aware of chronic disease risk factors they can modify through changes in eating and exercise habits. For example, county educators provide practical information on reducing heart disease risk by emphasizing recipe and meal modifications to reduce saturated and trans fats, cholesterol, and sodium, while increasing dietary fiber and the healthy fats found in such foods as fish and canola oil.</p> <p>Because the prevalence of obesity is increasing in Maryland, as it is throughout the country, Extension programs also focus on ways to help reduce obesity, especially among children. Programs delivered to parents, day care providers, and through the state's 4-H programs, Team Nutrition, and school lunch programs are designed to establish beneficial lifelong eating and exercise habits in children, and to promote a child's optimal growth and development. Such programs emphasize the importance of eating a well-balanced diet and regularly participating in enjoyable physical recreation. Extension educators collaborate with other institutions and agencies, such as the Maryland State Department of Health and Mental Hygiene and the State Department of Education, in their outreach efforts, particularly with respect to reducing obesity and encouraging the consumption of at least five servings of fruits and vegetables each day.</p> <p>Extension nutrition education programs are available to all segments of the state's population, but special efforts are made to reach residents at increased nutritional risk, such as limited income and food insecure individuals, senior citizens, women and infants participating in Maryland's Special Supplemental Food Program for Women, Infants and Children (WIC) , and other women of childbearing age or who are pregnant. We also provide information on the benefits of breastfeeding and recommended infant feeding practices. In addition to personal contacts, Extension specialists and county educators</p>	<p>Mark Kantor, Ph.D. Associate Professor and Cooperative Extension Specialist Department of Nutrition and Food Science Phone: 301-405-1018 mkantor@umd.edu</p>

		<p>Jump Into Foods & Fitness</p> <p>In this hands-on, Experiential Learning model-based curriculum, "JIFF (Jump into Foods and Fitness) the Joey", a kangaroo, sets the stage for youth ages 8 to 11 (grades 3 to 5) to learn about the importance of nutrition, increased physical activity, and food safety. The spiral-bound program book contains eight "Kangaroo Jumps" (sessions) designed for use in 60- to 90-minute meetings, although the individual activities can also stand alone. Family education is included in the form of reproducible take home newsletters. Written for use by adults, including volunteers, and older youths, the book includes a program summary, facilitator background on child learning, youth development, tips for working with children, and adapting JIFF materials for a variety of settings, as well as general implementation information, eight detailed lesson plans with copy-ready handout/templates, and a resource list. Each individual session includes objectives and learning life skills, background basics for fitness and nutrition for the facilitator, icebreakers and "Attention Getters", several learning activities with summary/reflection guides and reproducible handouts, snack and activity suggestions, family newsletter and additional resources, including web links. For additional resources and for families, staff, educators, volunteers, and for youth a supplementary website is available:</p> <p>http://web1.msue.msu.edu/cyf/youth/jiff/index.html</p>	<p>B'Onko Sadler, M.A.</p> <p>Associate Program Leader Children Youth Families & Communities, 160 Agriculture Hall Michigan State University E. 		<p>Mississippi In Motion</p> <p>Mississippi In Motion is a research-based, peer reviewed curriculum for a state-wide, community based twelve week program designed to promote healthy eating and encourage positive physical activity behaviors. Examples of lessons include information on chronic diseases (diabetes and heart disease), stress eating, fad diets, physical activity, MyPyramid and Serving Size, Eating Out Smart, Cooking Healthy, and goal setting. Professionals in the community and extension personnel teach the educational sessions. Health fairs in collaboration with local hospitals, kicks off the 12-week program, in addition, participants' BMI are calculated for the pre and post evaluation at the end of the twelve week educational sessions. Some county hospitals offer blood pressure screenings, glucose and cholesterol testing as part of the health fair to participants. Mississippi In Motion is MSU-IRB approved.</p> <p>A team concept encourages social support in adopting healthy lifestyle behaviors. Participants form teams of five members, choose a team name, and select a team captain. "Mississippi In Motion" is not about diets...but encourages program participants to adopt healthy habits for a lifetime.</p> <p>http://msucares.com/health/health04/ms_in_motion/index.html</p> <p>Program Targets Obesity Problem in Children</p> <p>A team of experts at Mississippi State University conducted preliminary research in preparation to implement a coordinated school health program called CATCH, or Coordinated Approach To Child Health, which focuses on health and physical education; school health, nutrition, counseling and social services; healthy school environment; school-site health promotion for staff; and family and community involvement. Anthropometric measurements of children and teachers/staff were collected to establish a baseline, and surveys/focus groups with parents were conducted to assess attitudes and barriers related to childhood overweight.</p> <p>http://msucares.com/health/</p>	<p>Dr. Jane Clary Health Specialist, MSU Extension Service 662-325-5014 jclary@ext.msstate.edu</p> <p>Sylvia H Bryd Department of Food Science, Nutritoin and Health promotion Mississippi State University phone: 662 325 0919 fax 662 325 8728 email shb5@msstate.edu</p>

		<p>Missouri Council for Activity and Nutrition (MoCAN)</p> <p>The Missouri Council on the Prevention and Management of Overweight and Obesity was created in 2003 to enable representatives of various organizations to develop a comprehensive plan to address the epidemic of overweight and obesity in Missouri. The mission of the Council was to document the economic impact and health implications of overweight and obesity for all Missouri families, regardless of income, and to recommend evidence- or research-based responses that could be undertaken by employers, schools, insurers, elected officials, individuals, families, communities, and state and local government. Upon completion of the plan this Council was officially disbanded, and an implementation council was formed. Representatives from groups interested in implementing the plan were invited to participate and they collectively chose the name of the Missouri Council for Activity and Nutrition (MoCAN). Meetings are held 4 times per year to implement work plans to achieve the plan's objectives, track on outcomes and evaluate which efforts are most effective.</p> <p>http://kchealthykids.org/mocan</p>	<p>Donna Mehrle Extension Associate 573-884-0929 mehrled@missouri.edu</p>
		<p>Missouri on the Move</p> <p>Missouri on the Move is an eight-week walking program based on using electronic step counters. The purpose of the program is to increase awareness and improve health by increasing physical activity through walking and using electronic step counters. 		<p>Montana Supplemental Nutrition Assistance Program -Education (SNAP-Ed)</p> <p>SNAP-Ed offers nutrition education to SNAP participants and persons eligible to receive benefits. SNAP-Ed participants are Montana families with children, youth, seniors, singles, and individuals with developmental disabilities throughout the state. Series lessons or single demonstrations are presented with practical information and skill-building tips for choosing healthier foods, preparing foods, learning appropriate food safety practices, modeling good food choices for children, and incorporating ways to be more physically active every day. The goal is to provide people with the opportunity to acquire skills that assist in choosing healthy lifestyles.</p> <p>http://www.montana.edu/nep/index.htm</p>	<p>Coleen Kaiser</p> <p>MSU Extension Nutrition Education Coordinator 101 Romney, PO Box 173360 Bozeman, MT 59717-3360 Phone: 406-994-6318 Email: coleenk@montana.edu</p>
		<p>Nutrition Education for Teachers</p> <p>In coordination with Montana Team Nutrition, Extension provides training to teachers so students have the opportunity to learn the components of a healthy diet, and are “called to action” to make positive changes in their daily food choices and physical activity. Nutritional and activity habits that begin in youth are more likely to be continued into adulthood. Nutrition education for educators is essential since teachers play an important role in helping children develop healthy eating and lifestyle habits. Teachers have been successful incorporating nutrition education into the classroom, which in turn helps children make positive behavior changes. In addition, this training emphasizes what teachers can do in the classroom to role model healthy behaviors.</p>	<p>Lynn C. Paul, EdD, RD</p> <p>MSU Extension Food and Nutrition Specialist 101 Romney, PO Box 173360 Bozeman, MT 59717-3360 phone: 406-994-5702 fax: 406-994-7300 email: lpaul@montana.edu</p>
		<p>Promoting Healthier Lifestyles and Well-Being</p> <p>Healthier lifestyles and prevention of chronic disease will result by increasing health-related behaviors such as healthy food choices, regular physical activity, and many other proven behaviors. Educational strategies that work at the individual, community and policy level can also be effective in promoting healthy lifestyles and well-being and preventing chronic diseases.</p>	<p>Lynn C. Paul, EdD, RD</p> <p>MSU Extension Food and Nutrition Specialist 101 Romney, PO Box 173360 Bozeman, MT 59717-3360 phone: 406-994-5702 fax: 406-994-7300 email: lpaul@montana.edu</p>

		<p>Chefs for Kids Nutrition Education Program</p> <p>Chefs for Kids is a nutrition education program for primary age children in high needs schools in the Clark County School District of Nevada. Chefs for Kids has two components: a thirty-seven lesson second grade curriculum that is taught by University of Nevada Cooperative Extension (UNCE) nutrition educators in the classrooms of twelve elementary schools throughout the school year, and a five lesson first grade curriculum that is also taught by UNCE nutrition educators in multiple high needs schools. The program educates and motivates children to apply knowledge gained to engender a healthy lifestyle and develop sound eating habits, the basis of a lifelong healthy body weight. It is tailored to the needs and abilities of the children. Key educational messages include the importance of eating a variety of foods from all food groups every day, building a physically active lifestyle, building strong food safety practices (hand washing), and choosing healthful snacks.</p> <p>http://www.unce.unr.edu/programs/health/index.asp?ID=16</p>	<p>Carolyn Leontos, MS, RD, CDE Area Nutrition Specialist University of Nevada Cooperative Extension 8050 South Maryland Parkway Las Vegas, NV 89123 Phone: (702) 222-3130 Fax: (702) 222-3100</p>
		<p>Expanded Food and Nutrition Education Program (EFNEP)</p> <p>The Expanded Food and Nutrition Education Program (EFNEP) is designed to assist limited resource audiences in acquiring the knowledge, skills, attitudes, and changed-behavior necessary for nutritionally sound diets, and to contribute to their personal development and the improvement of the total family diet and nutritional well-being. The Nevada EFNEP program offers the "Eating Smart, Being Active" curriculum, an eight-week lesson plan, providing nutrition education to limited resource families, helping them feed their families more nutritiously, save money, and keep their food safe.</p> <p>http://www.unce.unr.edu/programs/health/index.asp?ID=38</p>	<p>Mary P. 		<p>Veggies for Kids: Grow Strong</p> <p>The target audience for the Veggies for Kids program is second and third grade students at two Nevada schools having high percentages (>85%) of Native American students, one in Wadsworth (Washoe County) and one in Schurz (Mineral County). Of all ethnic groups, Native American children are at greatest risk for obesity, attendant development of diabetes and other chronic diseases. Findings from the Strong Heart Study and related studies show that, in Native Americans, intakes of vegetables and fruits are significantly less than recommended, variety is limited, and use of traditional foods – derived largely from plant sources, fish and lean wild game – is waning. It is recognized that exposures in youth can help shape food preferences later in life. Through 10 in-class education standards-based lessons, this program promotes awareness of the health benefits of traditional foods, promotion of their consumption, and subsistence or supplementary vegetable gardening as a means to promote the desired intake of vegetables and fruits recommended in the Dietary Guidelines 2005 and USDA's MyPyramid food guide.</p> <p>http://www.unce.unr.edu/programs/health/index.asp?ID=88</p>	<p>Kerry Seymour, MS, RD, CDE Extension Nutrition Specialist University of Nevada Cooperative Extension 5305 Mill Street Reno, NV 89502 Phone: 775-784-4848 Fax: (775) 784-4881 E-mail: seymourk@unc.eunr.edu</p>

		<p>Eat Smart, Move More, Weigh Less</p> <p>The Eat Smart, Move More, Weigh Less (ESMMWL) weight-management curriculum was created by a team of interagency professionals with expertise in nutrition, physical activity, and behavior change. Published research data were used to identify strategies that would lead to weight loss and/or weight maintenance. These included eating fewer calories; including more fruits, vegetables and whole grains in meals; eating breakfast regularly; controlling/decreasing portion sizes; eating more meals at home; drinking fewer calorie-containing beverages; keeping a food/physical activity record; increasing physical activity; and watching less television.</p> <p>The above strategies were used to create 15 ESMMWL lessons. The curriculum is presented in electronic and hard copy format and includes speaker notes, PowerPoint presentations, evaluation instruments and marketing materials. ESMMWL uses the Theory of Planned Behavior. Each lesson 1) discusses a behavior and its importance to the participant's goal of weight loss or weight maintenance 2) shows how others, including family members, can support the participant in doing the behavior and 3) provides strategies for adopting the behavior, empowering the participant to attempt the identified behavior. Additionally, each lesson includes a "family spotlight" describing ways the entire family can adopt the behavior, opportunities for sharing and celebrating success and tips for a guided discussion about the behavior. The curriculum also includes information and strategies to live mindfully, paying attention to the events, activities and thoughts that make up participants' lives.</p> <p>ESMMWL is delivered in group settings such as faith communities, worksites, civic clubs or other groups organized specifically for this purpose (e.g. weight loss class at a physician office). Pilot data indicate that program participants have a weigh loss on average of 8.5 pounds.</p> <p>http://www.eatsmartmovemorenc.com/ESMMWeighLess/ESMMWeighLess.html</p>	<p>Carolyn Dunn, Ph.D.</p> <p>Associate State Program Leader, Professor, Nutrition Specialist Box 7606 NC Cooperative Extension NC State University Raleigh, NC 27695 Phone: 919.515.9142 Email: carolyn_dunn@ncsu.edu</p>

		<p>The Impact of Interactive Multimedia on Nutrition and Physical Activity Knowledge of High School Students</p> <p>Creative ways to encourage adolescents to develop positive lifelong eating and physical activity patterns are needed. The project described here assessed the effectiveness of an interactive multimedia product, SyberShop, to increase knowledge and influence behavior change in nutrition and physical activity in adolescents. SyberShop was effective in increasing knowledge in students. Students using SyberShop scored 28% higher on a post-test compared to a control group receiving no nutrition education ($p < 0.001$) and 19% higher than a group of student receiving lectures. ($p < 0.05$). Using multimedia is an effective way to educate young people about healthy eating and physical activity.</p> <p>http://www.joe.org/joe/2006april/a6.shtml</p>	<p>Carolyn Dunn, Ph.D.</p> <p>Associate State Program Leader & Nutrition Specialist Professor Department of 4H Youth Development and Family and Consumer Sciences NC Cooperative Extension Box 7605 NC State University Raleigh, NC 27695 Phone: 919-515-9142 Email: carolyn_dunn@ncsu.edu</p>

RHODE ISLAND	<i>University of Rhode Island</i>	<p>Expanded Food and Nutrition Education Program (EFNEP) and Food Stamp Nutrition Education Program (FSNE)</p> <p>EFNEP of Rhode Island provides nutrition education in three ways: in school and other small group settings, to individuals in their homes, and through self-study "Learn at Home" curriculums. Adult discussion topics include food pyramid nutrition, menu planning and shopping, budgeting, feeding families, and food safety. Children learn about the food pyramid, healthy snacking, fruits and vegetables, food safety, and exercise. In the school setting, EFNEP paraprofessionals can work with teachers and nurses to help meet nutrition/health education standards for grades K-8.</p> <p>The goal of the Food Stamp Nutrition Education Program (FSNE) is to increase the likelihood that Food Stamp recipients make healthy food choices within their limited food budget. Initiated in 1997, the focus of the Rhode Island FSNE has been to improve the dietary quality of Food Stamp eligible Rhode Island families and individuals by providing them the skills, information, and motivation they need to support healthy eating consistent with federal dietary guidelines (Dietary Guidelines for Americans, USDA Food Guide Pyramid).</p> <p>Using a social marketing approach within the mass transit system, carefully crafted nutrition messages have been delivered by means of bus stop shelter posters in target neighborhoods, interior and exterior bus posters, interior digital messaging, local news media, toll-free hotline, and nutrition education materials developed to deliver campaign messages. These include: Strategies to simplify and improve meal planning and food shopping/budgeting; Strategies to improve dietary quality by increasing fruit, vegetable and calcium consumption and encouraging a fat moderate, high fiber (plant-based) diet; Information on safe selection, storage, and home preparation of nutritious foods; Local opportunities to improve food access and extend food resources.</p> <p>http://www.uri.edu/ce/efnep/</p>	<p>Linda Sebelia; Andrea Nero</p> <p>Nutrition Specialist 80 Washington Street, Room 302 Providence, RI 02903-1803 Phone: 401-277-5270 Fax: 401-277-5284 sebelia@uri.edu</p> <p>Andrea Nero EFNEP Supervisor 80 Washington Street, Room 302 Providence, RI 02903-1803 Phone: 401-277-5270 Fax: 401-277-5284 anero@uri.edu</p>

		<p>Lucy's Tasty Treasures</p> <p>Lucy's Tasty Treasures is an informative, entertaining, and adventure-filled children's series about healthy foods. The main character, Lucy, is on a summer assignment, a treasure hunt to locate and learn about healthy foods, such as fruits and vegetables, dairy and whole grains. Taking a "farm to table" approach, Lucy's Tasty Treasures also includes segments that show Lucy and her Mom, older sister, and/or neighbors in their home kitchen with foods Lucy learned about on her trips. They prepare quick and easy, kid-friendly recipes while discussing nutritional content and safe food handling practices. The Lucy's Tasty Treasures program also includes Tasty Bites, segments that are 1-2 minutes in length. These segments are used as "teasers" at the beginning of educational classes are shown during the morning announcements in schools.</p> <p>Supplementary materials include educator lesson plans that support and extend the learning opportunities; student activity sheets and photo-novellas; and, a web site (http://www.clemson.edu/lucystastytreasures/) containing video segments, games, recipes, podcasts, and a blog for students. The program is being broadcast through South Carolina Educational Television Instructional TV, and is available to the public on iTunesU.</p> <p>www.clemson.edu/lucystastytreasures</p>	<p>Katherine Cason, PhD, RD, LD Professor, Director of the Center for Healthy Living State EFNEP Coordinator Department of Food Science and Human Nutrition Clemson University 207 Poole Agricultural Center Clemson, SC 29634-0316 Phone: 864-656-0539 Fax: 864-656-0331</p>

	<i>University of Tennessee</i>	<p>Arthritis Foundation Exercise Program</p> <p>The AFEP is a community-based, non-clinical recreational exercise program developed by the Arthritis Foundation. While it includes activities designed to improve certain physical parameters, such as endurance and joint motion, the group exercise experience also encourages peer interaction and socialization.</p> <p>The AFEP offers several advantages over generalized community exercise programs. It is designed specifically for persons with arthritis, taking into consideration the pain, fatigue and decreased strength and motion that often accompany the disease. The program includes accommodations for individual limitations and does not encourage activities that might aggravate, rather than relieve, arthritis symptoms. In order to assure safe performance of the exercises, instruction about basic principles of arthritis exercise, correct body mechanics and joint protection are included.</p> <p>The program consists of two levels – a basic level and an advanced level. The instructor will design the program to fit the needs of the participants.</p> <p>http://fcs.tennessee.edu/healthsafety/afep.htm</p> <p>Arthritis Self-Help Program</p> <p>To decrease the disabling impact of arthritis on Tennesseans by teaching them how to self-manage their arthritis.</p> <p>http://fcs.tennessee.edu/healthsafety/ashp.htm</p>	<p>Barbara P. UTAH	<i>Utah State University</i>	<p>Walk Across Texas</p> <p>To encourage adults and children to establish the habit of regular physical activity, Texas Cooperative Extension designed, developed, and continues to promote Walk Across Texas!, a fun and fitness program to help participants adopt the habit of regular, moderate-intensity exercise. Teams of eight family members, friends, co-workers, or neighbors walk together or individually over the 8 weeks of the program. Some also attend Extension classes and receive information on nutrition, exercise, weight loss, and other health topics. Teams compete to see who can walk the 800 miles "across Texas" first, and all participants are recognized for their achievements. The program is ongoing, and since 1996 more than 85,000 Texans have participated.</p> <p>http://walkacrosstexas.tamu.edu/</p>	<p>Jenna Anding, Ph.D., R.D., L.D. VERMONT		Wellness Works Wellness Works is a friendly competition that promotes healthy living in adults and youth in with an emphasis on physical activity and nutrition. The program can be held on a community level, or with in a school, work place or neighborhood. Participants assess their own diet and current degree of physical activity. Participants have their blood pressure, heart rate, cardiovascular and cholesterol tested and recorded, as well as their height, weight, and BMI. They then set nutrition and fitness level appropriate goals for the next 12 weeks. Community events and activities are offered, such as nutrition and cooking classes, community walks and running competitions, community gardens classes, dance classes, soccer lessons, karate, swimming, and other classes for adults and youth. Incentives are offered throughout the program to increase interest and consistent participation.	Lisa Lewis, M.Ed. Assistant Professor of Extension Wayne County Extension PO Box 160 Loa, Utah 84747 435-836-1312

		<p>Expanded Food and Nutrition Education Program (EFNEP)</p> <p>EFNEP and Adults: The Expanded Food and Nutrition Education Program (EFNEP) is a free program that helps people learn to choose and prepare good foods for a healthy life. EFNEP serves limited resource families with children, pregnant women, and youth. EFNEP Educators are located around the state, and are available for both individual lessons and group classes (Cooking for Life, for example). EFNEP shapes the program to meet each person's particular needs.</p> <p>Cooking for Life is a free program taught by area chefs and EFNEP Educators that empowers parents and pregnant women with limited resources to cook healthy, affordable meals for their families. In a series of six group classes, participants receive hands-on instruction in meal planning, budgeting, shopping, and cooking. At the end of each class, participants are given the ingredients of the meal they just learned to prepare in class, so they can practice their new cooking skills at home with their families. Cooking for Life is a collaboration of the Vermont Campaign to End Childhood Hunger and the Expanded Food and Nutrition Education Program.</p> <p>EFNEP and Youth: EFNEP Educators collaborate with schools and community agencies that serve at-risk youth to offer group nutrition education programs. Programs are usually a four- to six-lesson series held in a school or community setting. We offer programs for youth of all ages and the focus is on fun, hands-on activities. Most of our programs are offered during out-of-school time and can include food preparation when community agencies are able to provide food/ingredients. Examples of youth group classes that EFNEP offers are Cooking for Life: Youth and Cooking for Life: Young Adult Children: http://www.uvm.edu/extension/food/?Page=youth.html</p> <p>Cooking for Life: Youth Is a free program that empowers limited-resource youth ages 9-14 to cook healthy, affordable meals. In a series of six group classes, participants receive hands-on instruction from area chefs and EFNEP Educators to develop healthy nutrition and cooking skills. At the end of each class, participants are given the ingredients of the meal they just learned to prepare in class, so participants can practice their new cooking skills at home with their families. 		<p>Fit Extension</p> <p>FIT Extension is an 8-week community-based program that uses the principles of group dynamics to encourage physical activity and fruit and vegetable consumption. FIT Extension was adapted specifically for Virginia, using the successful Walk Kansas program offered by K-State Research and Extension.</p> <p>www.fitextension.ext.vt.edu</p>	<p>Joan Wages, MS Associate Extension Specialist, Health and Nutrition Virginia Cooperative Extension 110 Hutcheson Hall (0908) Blacksburg, VA 24061 Phone: (540) 231-0664 FAX: (540) 231-0762 jwages@vt.edu</p>
		<p>Food Friends and Mighty Moves</p> <p>Food Friends and Mighty Moves is a social-marketing campaign (using the train-the-trainer model with childcare providers and Head Start teachers) developed by Colorado State University aimed at increasing preschool-aged children's motor skills, physical activity levels, and willingness to try new foods. The program bin includes an activity binder, hand puppets of 7 Food Friends and Mighty Moves (super hero) characters, memory games, activity cards, posters, jigsaw puzzles, placemats, paper pads, magnets, and children's books that incorporate physical activity and "try new foods" themes. Implementing the Food Friends and Mighty Moves program includes conducting a 15-20 minute activities once per week, reading storybooks on related themes, and opportunities to try new movements and/or new foods twice each week. Parents also receive related materials, including newsletters and recipes. Materials are available in English and Spanish.</p>	<p>Elena L. 		<p>Smart Choices in the Grocery Store</p> <p>Smart Choices in the Grocery Store is a project created to help shoppers, at the point of purchase, make healthier food choices. The project centers around six messages: Focus on Fruit, Think Your Drink, Vary Your Veggies, Increasing Whole Grains, Reducing Sodium, Getting Calcium for a Lifetime. The grocery stores that host this initiative are high volume food stamp participation stores. The intervention includes a small, taste-test of a nutrient rich food, store intercom announcements, handouts for adults and youth, display boards, and small posters.</p>	<p>Mary M. 		<p>Strong Women™</p> <p>The StrongWomen™ program, developed by Miriam Nelson and Rebecca Seguin of Tufts University, is an evidence-informed, community-based strength training program developed and disseminated to enable middle-aged and older women to maintain their strength, function and independence. The primary objective of the program is to help communities implement safe and effective strength training programs for middle aged and older women. The program provides education and guidance on strength training activities, and use of basic strength-training equipment such as free weights and ankle weights. Classes lasting 60 minutes are offered twice a week on nonconsecutive days for 12 weeks. In 2008, there are 27 Wisconsin counties that have trained StrongWomen™ program leaders.</p>	<p>Angela Flickinger</p> <p>Family Living Program Educator UW-Extension, Rock County Courthouse 51 S.
